Paraoptometric Certification (CPO) Review

Approach the test with a plan. I advise my students to identify their weak spots and to work around them. For many, math seems to be the sticking point. If that's the case, identify the math questions and finish them first. This allows you to give them more time and focus while leaving your "easier" questions for later on.

How To Do Your Best on the CPO® Test

For many, the math sections of the CPO® certification test are the most difficult and time-consuming. In this case, it would be best to skip over the math questions and answer every 'easy' question first. Once you have gotten through those questions, you can start chipping away at the more difficult ones.

How to Prepare for the CPO® Certification Test

The Paraoptometric exam is designed around what they expect a paraoptometric to see. It covers a broad array of topics (although not very deep, due to the amount of topics they cover). There are questions about glasses, contact lenses, phone triage, medical conditions of the eye (the majority of the exam).

Just took the Paraoptometric Assistant exam

However, these pretest questions do not count toward the final score. Here is a look at the number of questions that are scored on each exam: CPO: 100 questions; CPOA: 200 questions; CPOT: 225 questions (written) CPOT: 200 questions (clinical) There is a \$280 fee to take the CPO certification exam while the other exams carry a fee of \$300.

CPO, CPOA, and CPOT | Optician | Jobs | Training | Career
