In a world torn apart by religious extremism on the one side and a strident secularism on the other, no question is more urgent than how we live with our deepest differences—especially our religious and ideological differences. The Case for Civility is a proposal for restoring civility in America as a way to foster civility around the world. Influential Christian writer and speaker Os Guinness makes a passionate plea to put an end to the polarization of American politics and culture that—rather than creating a public space for real debate—threatens to reverse the very principles our founders set into motion and that have long preserved liberty, diversity, and unity in this country. Guinness takes on the contemporary threat of the excesses of the Religious Right and the secular Left, arguing that we must find a middle ground between privileging one religion over another and attempting to make all public expression of faith illegal. If we do not do this, Guinness contends, Western civilization as we know it will die. Always provocative and deeply insightful, Guinness puts forth a

vision of a new, practical "civil and cosmopolitan public square" that speaks not only to America's immediate concerns but to the long-term interests of the republic and the world.

Goes beyond a superficial discussion of proper manners to present civility as a mindset that encompasses values and attitudes that help you embrace your connections to others and repair society.

In *Constructing Civility*, Richard Park bridges Christian and Islamic political theologies on the basis of an Aristotelian ethics. He argues that modern secularism entails ideological commitments that can work against the promotion of public civility in pluralistic societies. A corrective outlook on public life and the public sphere is necessary, an outlook that aligns with and recovers the notion of the human good. Park develops a framework for a universally applicable public civility in multifaith and multicultural contexts by engaging the central concepts of the "image of God" (*imago Dei*) and "human nature" (*fitra*) in Roman Catholicism and Islam. The study begins with a critique of the social fragmentation and decline of public life found in modernity. Park's central contention is that the construction of public civility within Christian and Islamic political theologies is more promising and sustainable if it is

reframed in terms of the human good rather than the common good. The book offers an illustration of the proposed framework of public civility in Mindanao, Philippines, an area that represents one of the longest-standing conflicts between Christian and Muslim communities. Park's sophisticated treatment brings together theology, philosophy, religious studies, intellectual history, and political theory, and will appeal to scholars in all of those fields.

This highly anticipated, fully revised second edition revisits and augments the award-winning *Creating & Sustaining Civility in Nursing Education*. In this comprehensive new edition, author Cynthia Clark explores the problem of incivility within nursing academe and provides practical solutions that range from ready-to-use teaching tools to principles for broad-based institutional change. She further explores the costs and consequences of incivility, its link to stress, ways to identify the problem, and how to craft a vision for change – including bridging the gap between nursing education and practice. Rather than dwell on the negative, this book focuses on solutions, including role-modeling and mentoring, stress management, and positive learning environments. Nurse educators at all levels will appreciate the variety of evidence-based strategies that faculty – and students – can implement to promote and maintain civility

and respect in the education setting, including online learning.

Cultural observer Os Guinness argues that the American experiment in freedom is at risk. Guinness calls us to cultivate the essential civic character needed for ordered liberty and sustainable freedom. True freedom requires virtue, which in turn requires faith. Only within the framework of what is true, right and good can freedom be found.

Civil society is losing it's civility. Many Americans think public manners and behavior have deteriorated, especially in public discourse about polarized political, moral, and cultural issues. But democracy and cultural progress require a robust civility in public discourse if they are to be successful endeavors. Our sharply divided world is in great need of a civility that facilitates respect, honor, and kindness toward ideological opponents. The contributors to this edited volume represent philosophical, theological, psychological, historical, and sociological perspectives, providing analysis of intellectual virtue and vice as well as explorations of their application to specific problems in contemporary society. In acknowledging the current climate of contentious and ineffective civil discourse, *Virtue & Voice* highlights how the cultivation of intellectual virtue can renew our voices and

Following the extraordinary success of the "New York Times" bestseller "Bonhoeffer," Metaxas' latest book offers inspirational and intellectually rigorous thoughts about the great questions surrounding us all today.

The title of this book is a misnomer. It is not an attempt to get anyone to shut up, but rather to provoke a discussion. This book is intended to be a warning about the philosophy of "Christian postmodernism." The reader will learn some basic principles that can be used to engage their arguments. Part 1 is a response to some of the recent writings by Frank Schaeffer, the son of the late Francis Schaeffer. This was originally written as a defense against Frank's attacks on pro-life street activism - a movement that his father helped bring into being through his books. Part 2 is a response to Colonel Doner and his book, Christian Jihad: Neo-Fundamentalists and the Polarization of America. There are thousands who have had their lives impacted in a powerful way by the elder Francis Schaeffer. As a new generation is emerging, it is important to recognize the mistakes that Christian activists have made in the past even while holding to a vision for the future.

This book critically analyses the important

role of radio in public life in post-apartheid South Africa. As the most widespread and popular form of communication in the country, radio occupies an essential space in the deliberation and the construction of public opinion in South Africa. From just a few state-controlled stations during the apartheid era, there are now more than 100 radio stations, reaching vast swathes of the population and providing an important space for citizens to air their views and take part in significant socio-economic and political issues of the country. The various contributors to this book demonstrate that whilst print and television media often serve elite interests and audiences, the low cost and flexibility of radio has helped it to create a 'common' space for national dialogue and deliberation. The book also investigates the ways in which digital technologies have enhanced the consumption of radio and produced a sense of imagined community for citizens, including those in marginalised communities and rural areas. This book will be of interest to researchers with an interest in media, politics and culture in South Africa specifically, as well as those with an interest in broadcast media more generally.

universally condemned for what is now nearly universally celebrated--the almost total desecration of the created order (Rom 1:18-32). And those who refuse to celebrate are threatened with the loss of their business, their home, and life's savings. Virtually everything formally considered right and true, sane and decent are now exchanged for inhuman, indecent, pagan values. Our nation's nearly universal refusal to acknowledge God has resulted in our alienation from God and our lawless insanity. This book is not intended to condemn America but to restore sanity and civility to the greatest nation on earth through a minority of united, faithful, and courageous believers in whose lives the Sermon on the Mount takes narrative form.
