A vibrant and sturdy word book featuring fruits and vegetables from around the world from Caldecott Honor – winning author-illustrator Lois Ehlert featuring upper- and lowercase letters for preschoolers just learning language. Apple to Zucchini, come take a look. Start eating your way through this alphabet book. Each turn of the page reveals a mouth-watering arrangement of foods: Indian corn, jalapeno, jicama, kumquat, kiwifruit and kohlrabi. Lois Ehlert's lively watercolors paired with bold easy-to-read type make for a highly appealing and accessible book for parents and children to devour. At the end of the book, Ehlert provides a detailed glossary that includes pronunciation, botanical information, the origin and history of the particular plant and

occasional mythological references, with a small watercolor picture to remind the reader of what the plant looks like.

What are vegetables, anyway? Give kids the 411 on veggies with this richly illustrated introduction to produce! Peppers, beans, corn, and peas! Nonfiction superstar Gail Gibbons lays out the basics of veggies with colorful watercolors and straightforward text. Learn how they grow, how they get to stores, and how many kinds there are—and learn some weird trivia, too! Diagrams, cross sections, and illustrations get kids up close and personal with glossy red peppers, plump orange pumpkins, delectable little peas, and dozens of other vegetables in this essential primer on the subject.

English Italian bilingual children's book. Perfect for kids studying English or Italian as their second language. Little Jimmy doesn't like to brush his teeth. Even when his mother gives him a brand new orange toothbrush, his favorite color, he doesn't use it like he is supposed to. But when strange and magical things start happening to Little Jimmy, he begins to realize how important brushing his teeth can be. I love to brush my teeth is a delightful story full of beautiful illustrations sure to get your little ones attention. If your child is having difficulty learning to brush their teeth then this is the book for you to share together.

"A comprehensive and entertaining historical and botanical review, providing an enjoyable and cognitive read." —Nature The foods we eat have a deep and often surprising past. From almonds and apples to tea and rice, many foods that we consume today have histories that can be traced out of prehistoric Central Asia along the tracks of the Silk Road to kitchens in Europe, America, China, and elsewhere in East Asia. The exchange of goods, ideas, cultural practices, and genes along these ancient routes extends back five thousand years, and organized trade along the Silk Road dates to at least Han Dynasty China in the second century BC. Balancing a broad array of archaeological, botanical, and historical evidence, *Fruit from the Sands* presents the fascinating story of the origins and spread of agriculture across Inner Asia and into Europe and East Asia. Through the preserved remains of plants found in archaeological sites, Robert N. Spengler III identifies the regions where our most familiar crops were domesticated and follows their routes as people carried them around the world. With vivid examples, *Fruit from the Sands* explores how the foods we eat have shaped the course of human history and transformed cuisines all over the globe.

Depicts and discusses edible parts of plants, challenging the reader to identify them from the photographs.

From apples and grapes to pears and bananas, learn about the wonderful things fruits can do for your body! Carefully leveled text and colorful photographs teach early readers about nutrition and the importance of fruit in a healthy diet.
