### Cosmetic Active Ingredients In Cosmetics

So in cosmetics, the term "active ingredient" is a marketing term for an ingredient that people believe has some effect but is not legally allowed to. For example, some marketers say Vitamin C is an active ingredient for skin lightening.

### What is an active ingredient in cosmetics - Chemists Corner

Here is my opinion about cosmetics, active ingredients and their effectiveness. 1. If an ingredient is added to a cosmetic and it is going to somehow interact with your skin cells and change the body metabolism, then the ingredient (and product) is a drug. 2. If your product is not a drug then it will not have any significant impact on the skin ...

### Do Active Ingredients in Cosmetics Work? - Chemists Corner

The precise types of active ingredients used in a product are based on an item's function. Common acne-fighting ingredients might include salicylic acid or benzoyl peroxide. Natural anti-aging products might contain antioxidants, such as vitamins C and E, as well as alpha hydroxy acids to reduce fine lines and wrinkles.

### Active Ingredients in Skin Care | Healthfully

In addition, the percentage and exact function of each active ingredient must be approved by the FDA. Products in this category are referred to as "over-the-counter" or "cosmetics that are also drugs"; the portion of an ingredient list with the active ingredients is referred to as the "Drug Facts" label. [1]

### How to Understand Cosmetic Ingredient Lists | Paula's Choice

Cosmetic Active Ingredients: these ingredients are necessary if the product is to do its job. For example, skin-care products generally contain an emollient to make the skin feel smooth and soft. The emollient would be the cosmetic active ingredient.
