### **Emotional Eating: How to Overcome It - WebMD**

How the mood-food-weight loss cycle works Emotional eating is eating as a way to suppress or soothe negative emotions, such as stress, anger, fear, boredom, sadness and loneliness. Major life events or, more commonly, the hassles of daily life can trigger negative emotions that lead to emotional eating and disrupt your weight-loss efforts.

### **Weight loss: Gain control of emotional eating - Mayo Clinic**

Emotional eating is using food to make yourself feel better—to fill emotional needs, rather than your stomach. Unfortunately, emotional eating doesn't fix emotional problems. In fact, it usually makes you feel worse. Afterward, not only does the original emotional issue remain, but you also feel guilty for overeating.
