® manufactures flexible and rigid polyurethane casting foams (PolyFoams) and a flexible, silicone foam (PlatSil ® SiliFoam). PolyFoam Series foams are two-part, self-skinning polyurethane systems that are used to cast lightweight rigid or flexible objects with densities in the range of 3 to 20 lb/ft³.

Development Corp.

Flexible and rigid foams work best in silicone molds. Foams are measured by their expansion per cubic foot. A 2# foam for example, is 2 pounds per cubic foot once expanded and cured. This means that 1 pound of A mixed with 1 pound of B will yield a cubic foot of foam in free rise.

Flexible And Rigid Polyurethane Foam Products

Polyurethane products have many uses. Over three quarters of the global consumption of polyurethane products is in the form of foams, with flexible and rigid types being roughly equal in market size. In both cases, the foam is usually behind other materials: flexible foams are behind upholstery fabrics in commercial and domestic furniture; rigid foams are
