NLP training for Project Managers - Peak Performance
We all know that so called 'soft skills' are necessary for effective project management. Emotional intelligence frameworks help to define soft skills and show how they are important, but are they constant or can they be improved, and if so, how? Neuro Linguistical Programming (NLP) is the study of human excellence. It is the science of how the brain codes learning and experience, and can be described as a user's manual for the brain.

NLP for project managers
NLP (Neuro-Linguistic Programming) for Project Managers in its purest sense is a book for any project practitioner who wants to improve on their behavioural competencies in project management. In other words it is that area of development that often gets neglected or overlooked in favour of more technical aspects of project management like process and methods.
