The Toaster Project: Or A Heroic Attempt to Build a Simple Electric Appliance from Scratch by Thomas Thwaites

At once a charming manifesto for the maker movement and a poetic reflection on consumerism's downfall, The Toaster Project tells the story of Thwaites’s journey from choosing the simplest task to select to constructing research papers to create a toaster (made from 21st-century materials). In the course of the project, all parts of the toaster itself had to be made from scratch and Thwaites had to make the toaster itself made from the very raw materials.

The Toaster Project was an attempt by Thwaites to build a modern appliance, in this case a toaster, from scratch. Starting with digging up the required ores and fabricating plastic and electrical cables etc from the raw materials.

The humility the Toaster Project inspires is fantastic and very much needed. Would you consider working on a “sequel”...
