Wet Or Dry Tormek En

The wet-grinding method leaves a polished, burr free edge without any overheating of the tool. This polished surface creates less friction in use, thus aiding the durability of the cutting edge. Due to less frequent sharpening with wet grinding, the tool life is significantly prolonged, since less material is removed. The dry grinding method

My Tormek stone is well worn and the basin has to be nearly full for it to make a reasonable dip into the water. The second slot on the Jet is a convenient and thoughtful addition. The Jet basin also extends out over the back of the wheel and catches slightly more water coming downward off the stone.
